

FLOWS THROUGH CHECKPOINTS ANALYSIS

Team Progetto Creativo has developed an unique monitoring system enabling to monitor the visitors' flow in any kind of public event.

The flow monitoring is done through binocular 3D digicams to be positioned in any point overhead the event's access gates. A specifically developed software will process the images and count every single passage – incoming and outgoing. It has a good level of accuracy even in the presence of concentrated and concentrated traffic flows.

STEP 1

SENSORS

Once installed, the entire video sensors' network is monitored from a single remote control desk.

STEP 2

MONITORING

Alert signals will be sent in case of malfunction and/or for any specific event that could be foreseen.

STEP 3

DATA ANALYSIS AND VALIDATION

The data reliability is controlled through both specific algorithms and our operators' supervision.

STEP 4

REPORT FOR THE CLIENT

Full report are produced, including both directly collected and elaborated data, according to any client's specifications.

TEAM PROGETTO CREATIVO

The Company has developed his own techniques and built up an unique expertise in surveying, elaborating and cross-referencing access datas of visitors getting in any kind of public event.

The analysis of access and presence datas are instruments crucial to assess in any monent the level of risk , hence improving the level of security for the public.

***Emergency paths and safe exits
can be individuated and
activated in real-time***

MAXIMUM CAPACITY TO ASSESS IN REAL TIME THE LEVEL OF PROXIMITY TO THE MAXIMUM CAPACITUIY OF THE VENUE. THIS IS HIGHLY USEFUL TO PREVENT OVERCROWDING WHICH COULD EFFECT THE SECURITY LEVELS AND TO GIVE THE EVENT'S ORGANIZATION A TOOL TO EFFECTIVELY AND DULY CONTROL AND MONITOR THE ACCESSES AND, IN THE EVENT LIMIT CAPACITY IS REACHED, TO DISPONE ON-TIME THE CLOSING OF THE GATES AS LONG AS IT MAY BE NECESSARY TO GET BACK INTO SAFETY ZONE.

WE OFFER THE BEST SERVICES

We provide our services nationwide in Italy and in any other Country through specific partnerships.

We provide fast and effective support service through dedicated telephone line and mail..

After the validation process , the flow/access datas can be delivered to the client in standard or in any specified format as requested.
